CHINESE NEW YEAR REFLEC-TIONS AT THE MAGISTRACY.

Hongkong, November 16 1909. 1424

The principal items at the Magistracy this morning were robberies or attempted robberies and it reflect: greatly to the credit of the police that the would-be robbers did not succeed in their nefarious plans. Two men were charged with attempted armed robbery at No 121 Wing Lok Street and the case was remanded. One was arrested as he was leaving the house while the other escaped and was eventually captured by detectives. An alarm was raised and this caused them to bolt. Another story of a robbery comes from 44 Praya, Shaukiwan West. It is presumed that a man concealed himself in the house and when the woman occupant had retired he stole a watch and \$20 in money and got away. She had secured the door safely when she had gone to bed but

in the morning she found it open.—At No. 31 Pottinger Street there was another attempted armed robbery. Three men went to the house, which is the residence of on Chinese doctor, and asked if the doctor was in. The concubine replied that he was not and they promptly proceeded to bind and gag her and decamped with jewellery worth \$295 and three promissorymotes. A boy who was on the verandah was also bound and gagged. A native was also sentenced to one month's imprisonment for being a rogue and vagabond. It appears that while he was attempting to open the door of the office of Mr Leo D'Almada o Castro he was seen by Mr D'Alamda's boy who asked him what he wanted. He replied that a man named Li, who was supposed to be downstairs, had told him to go up and see the colicitor. The boy then accompanied him downstairs to see this Mr Li but on arriving at the door defendant ran away and was eventually captured .-- While at the Chinese fair on Sunday night in Jervoise Street a man snatched a cont. from another man and for doing so and also for returning from banishment defendant was contended to one year's imprisonment with hard labour and six hour's stocks. Defendant admitted both offencia. The head coolie of the Naval Yard was sentened to six weeks' imprisonment with four hours' stocks for stealing a watch and chain and two medals from Constable Heath of the Naval Yard. He endeavoured to pawn them at a pawn-calop in Hollywood Road but the pawnbroker was suspicious and promptly took him to the police station.—An attempted robbery also occurred No. 41 Saitau, Kowloon City, and at the Magistracy two mon were remanded in connection therewith. It appears that they entered the house which was occupied by an old woman and having got inside they shut the door and proceeded to bind and gag her. However she screamed out "Savo life" and as a number of people gathered at the door of the house the desperadoes. thought it lafer to decamp but were frustrated from doing so .- A sentance of Business Notices.

A Talk on Hall's Distemper.

HAUL'S Distemper continues to grow in popularity both at home and abrow In The widely increased demand during the past year has been another great tribute to its sterling worth. Leading Architects and Builders are specifying it. more than ever, and it has been selected for use in a great many of the leading. public buildings such as The Tower of London, The Royal Mint, The Royal Hospital Chelsea; The War Office, The Admiralty, The National Gallery, The British Museum, The General Post Office, The Offices of Woods and Forests, etc., and in Buckingham and St. James' Palaces.

While a description of Hall's Distemper is no doubt superfluous, we beg to remind Architects, Builders, and Householders of the following special points:-

It is made in two qualities—The Inside quality is the modern scientific substitute for wall-paper; it makes a more artistic, practical, and healthier wall covering altogether.

The Outside quality is fully weather resisting, it can be used on wood work, iron work, brick work, stone, etc., and can be painted or varnished.

Hall's Distemper-no doubt owes a great deal of its popularity to its ease of pplication and great covering power, resulting in economy in both material and labour costs. I cwt. will cover double the surface of 1 cwt. pure white lead, and it dries evenly, overcoming the difficulty of obtaining a uniform tint on

There is no wall covering so hygienic as Hall's Distemper. It contains a powerful germicide, and when applied it is instant death to all insect life. It is washable after three weeks by being lighty sponged with warm water.

Special Note.-Hall's Distemper should not be confused with the meny so call Washable Distempers now offered for sale, nor with that class of material which requires elaborate preparation of walls. Hall's Distemper is unique preparation with entirely distinct advantages, and is made only by Sissous Brothers & Co., Ltd., Hull, and London. Sole Agents for South Chinal:-

AMOY MUNICIPAL COUNCIL.

(From Our Own Correspondent.)

The Annual Report of the Kulangsu Municipal Council for the past year 1910 is 76 now printed and issued for circulation, and very interesting document it is. It is not possible to comment on all the points that are brought out in the Report, reference to a few of them may not be with- whole has been good, much better than in out interest to readers of the China Mail. To speak of Finance first. As to Revenue, the receipts have exceeded the estimate by about \$1,000, the exact sum received being \$26,539.68. Unfortunately the expenditure has exceeded this by \$868.84, though this is accounted for by the special measures taken to open new wells and to deepen old ones, on which \$658.13 were spent. This does not include the extra expenditure allowed for the new scheme of an artesian well, which will fall into the present year. Luckily, however, there was a substantial surplus of 83, 173.00 over from 1909 and of this \$2,000.00 goes to the sinking Fund for Redemption of Deben tures, and after deducting the above Debit

Balance of \$668.00, there is still a Credit Balance to be carried forward of \$504.00, so that the working expenses of the year may be considered as very satisfactory. As regards the personnel of the Council, three of the members chosen in January, 1910, left for home during the year and community, both of Chinese and Foreigners, their places were taken by three others and to make it evident that the benefits of chosen by the Council. Mesers W. H. Itlie new regime are by no means in Wallace, I. S. Fenwick and I Mencarini significant, as they tend to grow greater left and Mesers L. I. Thomas, W. Wilson, every year. The members chosen to serve and H. B. Pike took their places. To aid the indefatigable Secretary, Mr C. Berkeley Mitchell, in his work, the services of Mr A. C. Percy were obtained, but he was only able to remain a short time from September 8th to December 16th. But further negotiations are in progress to obtain another assistant in his place.

Good work has been done during the year in improving the drains, in repairing the roads, and in opening up now roads, and as nearly all this work has been done by prisoners, it has been very cheaply and yet effectively done. An excellent project on the party of the

Chinese residents on the island is the proposal to form a Health Society to create a stronger interest in matters sanitary, and such a Society would naturally receive the hearty support of the Council as well as of | keeping. Saves Time, Worry and Money, all foreigners. There is room for enormous improvements in cleanliness and sapitation among the Chinese and anything that can awaken interest and induce more carevin these matters is to be heartily welcomed. Lengthy communications on the subjects of Qualifications of Votors and Quarrying fill up eight pages of the Report, but as regards these nothing further need be said. It is certainly a good thing that the indisoriminate destruction of prominent rocks has censed, since the quarrying already donehas spoilt the appearance of the Island in many places.

The licensing of Opium Shops has censed: but the Secretary is obliged to state that

the Chinese Officials apparently show little keenness to suppress the opium habit since they are so reluctant to convict those who are summoned for breaches of the

Included in the Report is the Health Officer's Report showing 6 deaths among Foreigners and 208 Chinese, but of these only 11 occurred from Plague, and as far as can be traced these were all imported cases. The health of the community as a some previous years. The Secretary also presents a separate

statement concerning Police and the Gaol which shows the need for an increase in the staff of Sikh Policemen owing to the many robberies. There are now three Police Stations on the Island all connected by telehone. There are several pages of correspondence concerning stolen property which show the great difficulties with which the police are confronted in their efforts to deal with robberies and the restoration of stolen property. It cannot yet be said that the Chinese Authorities give that measure of assistance that they ought to give in cases of robbery.

The Report concludes with Statistical Tables of the number of Summonses and Prisoners, the Budget for 1911 and the Expenditure and Revenue for, 1910. survey of the whole shows that adequate efforts are being taken to preserve the peace and salety and comfort of the on the Council do their honorary labour with care and patience and all honour is due to them for so faithfully fulfilling the duties of their office. Praise too is due to the Captain Superintendent of Police for his ceaseless vigilarice and earnest attention to duty, and continued forethought on behalf of all the in habitants of Kulangsu.

NEW GUINEA REVOLT.

Official Report of the Murder of Four Germans.

The steamer Prinze Siginmund, which arrived at Brisbane from New Guinea on December 25, brought news of the missing steamer Germania. The delay was caused by her presence being necessary at the island of Ponape, as a protection to the Europeans there against the natives who had risen in revolt, as a result of which four Europeans and several loyal natives lost their lives. The Germania stayed at the island until a gunboat arrived.

The official report of the revolt shows that Mossrs. Boder, district magistrate

Hoolborn, office assistant; Branckman, secretary; and Hoffner, road-making export, were killed by the natives. On October 18, one of the natives working on a road in the Fermoy district became insubordinate and he was reported by Mr Hoelborn and punished by Mr Boder. This incensed the other natives, who refused to go on with the work, and assumed such a menacing attitude that Messrs Hoelborn and Hoffner were forced to seek protection at the Roman Catholicmission. Messra. Boder and Branckman, on hearing of the revolt, reached the scene of the outrage, and approached the natives. Mr Boder was shot through the head and killed instantly. Mr Branckman then tried to get back to the boat. He was fired at, but managed to reach the water, where he wasstabled to death. Two native

sorvanta escaped into the bush. The tiring

was heard at the Roman Catholic mission, and the Rev. Father Gebharm and Messrs Hoelborn and Hoffner went out. Father Gebliaria was fired at twice, but the shots did not take effect. Messis. Hochorn and Hoffner made a dash for the boat, and were immediately attacked by a browd of natives. Mr Hoelborn was stabbed, and Mr Hoffner was shot. The boatmen, five natives, were killed, being either shot or stabbed. The rest of the inhabitants of the island were in a perilous position as the recalcitrant natives numbered 200 and the native soldiers only 50. Some loyal natives were brought from the islands, and these proved sufficient to keep the rebels

at bay until the arrival of the Germania

had a quietening effect.

The consumption of beer in Germany, according to official statistics, is rapidly decreasing: During 1909 the consumption diminished approximately by 65,000,000 gallons, or one gallon per head of the population. During the preceding year there had been a diminution of nearly 70,000,000 gallons, whilst during the last decade there has been a decrease of three gallons per head of the population per annum. The decline in the browing trade is also revealed by the diminishing number of breweries in Germany. In 1906 there were 6035; in 1907, 5792; in 1908, 5590; and in 1909, 4768. During 1909 alone there was thus a decrease of 822 breweries. The decrease in the consumption of malt has been considerably greater than is indicated by the diminution in the consumption of beer, thus showing that the beer drunk in Germany becomes lighter and lighter every year.

MRS. EDDY'S LAST DAYS.

It appears that Mrs Eddy had been ailing for more than a week, but no practising physician was called in, the members of her household, most of whom are Christian Science healers, giving her the regular treatment. According to Mr Alfred Farlow, the American Press agent for the Christian Sccience Church, Mrs Eddy herself brought: all her powers to bear in an effort to heal herself of the "error." She retained all her Home Rule and a great authority on the faculties up to the last moment, and the end was peaceful. 'As there had been no doctor in attendance, the "medical examiner" for the district was called in to see the body. He put upon the death certificate the words: "Natural causes; the contributory cause being probably pneumonia."

"If I only had another chance !"

How often does a man utter these despairing words when vital forces depressed-often as the result of his own errors or follies-and he realises the infinite possibilities which might lie in his grasp could be indeed receive, in Shakes-peare's phrase, "A Second Life."

Happily, this other chance, this second life, is to be had for the asking by means of that

Tonic Food for the Brain and Nerves which has been aptly described by a famous physician as "the last word science has spoken" on the subject of such remedial agents, and to which, by virtue of its health-giving

properties, the name of Sanatogen—meaning," Health Producer"—has been given... So potent is its force that it will not only restore the health and vitality which have been lost, but, if persevered in, will, in addition, impart the highest measure of nervous and physical vigour of which the individual is capable; for there is a maximum capacity of health for-everyone, although he may not hitherto have had the fact impressed upon him.

Doctors endorse this, and daily prescribe Sanatogen in increasing quantities. The constituents which give Sanatogen its power are known to every physician. What they are is described below in the plainest terms in the analysis of Sir Charles A. Cameron; the Chief Medical Officer of Health and Public

Medical testimony of its value can be read in the stateent of Dr. C. W. Saleeby, the well-known medical author. ver twenty-five thousand doctors presering Sanategett in their daily practice, while some twelve thousand physicians have testified to its merits as

A Revitalising Force.

In Malaria, Dysentery, Low Fever, and other wasting diseases incidental to life in the Tropics it acts "like a miracle," to quote the words of a physician who has used it largely. It reconstitutes the blood, rebuilds the body, reinvigorates the health, reinforces the strength, restores the vitality, revivines the waning powers, and revitalises the nervous system, until the patient is as well as he was before his illness, while it safeguards him from further attacks.

The typical letters of Sir Gilbert Parker, M.P., and Miss Ellaline Terriss are selected from hundreds of communications of famous men and women who have of their own free will written of the debt they owe Sanatogen.

Anyone desiring to learn more about Sanatogen and the conditions for which it is peculiarly appropriate is invited to write for an instructive book, "How to Keep Well in Tropical Climates," which will be sent free to those mentioning this paper, on application to Messrs. A. S. Watson & Co., Hongkong and Shanghai.

Sanatogen, which, by the way, is used in the Royal' Family, can be obtained at all chemists and bazaars, or from Messrs. A. S. Watson & Co., Hongkong and Shanghai.

Medical Opinion Telling Analysis

DR. C. W. SALEEBY, the well-known medical author:

Analyst for Dublin.

" 13. Creville Place, London, N.W. "Senatogen is a specially adapted food that has solved the problem of giving phosphorus in such a way that the nervous system can take hold of it. I would specially refer to its value in the feeding of invalids, whother during actual

illness or during convalencence, and for nuring,

SID CHARLES A. CARERON, C.B., M.D., F.R.C.P., D.P.H., Medical Officer of Health and Public Analyst, Dublin, etc. e

"On analysis it proved to be composed of 9.5% moisture, and 90.5% of dry matter, including 7,37% of ash. It contained 83,13% of Albaminoids (nearly wholly made up of casein, but including a little albumin), together with 2.2% of phosphoric acid, a small portion of which existed in the albuminoids, but by far the larger portion was in the form of sodium phycero-chombate."

SIR CILBERT PARKER, M.P., the popullar novelist

20. Carlton House Terrace, S.W.

1 have used Sanatogen at intervals dince last autusm with extraordinary benefit. It is to my mind a true food tonic, feeding the nerves, increasing the energy, and giving feeds vigour to the overworked body and mind.

Miss ELLALINE TERRISS, the favorrite Hick Theatre, Land n. W. "I have every reason to be gratural to Sanatogen, for it has completely revitalized and restored me to perfect health."
